- Provided extensive technical support to all on campus students as well as faculty departments
- Analyzed system problems and implemented necessary hardware, software, or configuration process changes

PROJECT EXPERIENCE

Barter, Web Application Developer

January 2021 – May 2021

Developed a web application that allows students to buy and sell textbooks and other things within campus. Students can trade books by finding other students on campus with a needed textbook from a previous class on the Barter web application.

Friends, Mobile Application

November 2021 – Present

Developing a mobile application that helps college students find other students in their specific major on their campus. All posts and activities will go through a filtering algorithm that either allows or denies a given post before it becomes public on the app.
